

Do we need universal, shared and easy accessible information environment for crisis management and humanitarian operations (ALICJA)?

Yes!

But...

- technology barrier (for users) **No problem**
- expenses for tools (products) & equipment **No problem**
- access to geo-information and its cost **No problem**
- reliability and usefulness of information **Challenge**
- use of technologies based on www in poor (none) infrastructure areas **Challenge**
- server efficiency – access for multiple users **Challenge?**
- safety and security of information **Challenge**
- management of huge „database” environment (replication of data) **Challenge**
